Cancel Order V3

Sandbox Enabled

API to cancel an open or pending order which can be applied to both After Market Orders (AMO) and regular orders.

Additionally this API includes latency information in the meta data object of the response, providing insight into the time Upstox took to process your request.

Request

```
curl --location --request DELETE 'https://api-hft.upstox.com/v3/order/cancel?order_id=240108010445130' \
--header 'Content-Type: application/json' \
--header 'Accept: application/json' \
--header 'Authorization: Bearer {your_access_token}'
```

For additional samples in various languages, please refer to the Sample code section on this page.

Query Parameters

Name	Required	Type	Description
order_id	true	string	The order ID for which the order must be cancelled. For the regex pattern applicable to this field, see the Field Pattern Appendix.

Responses 200 4XX

Response Body

```
{
    "status": "success",
    "data": {
        "order_id": "1644490272000"
    },
```

```
    "metadata": {
        "latency": 30
    }
}
```

Name	Type	Description
status	string	A string indicating the outcome of the request. Typically `success` for successful operations.
data	object	Response data for Cancel order request
data.order_id	string	Reference order ID
metadata	object	Order metadata associated with successful cancelled order.
metadata.latency	integer	The overall time taken by API platform to process the order cancellation request, measured in milliseconds.

Sample Code

Cancel an open order

Python | Node.js | Java | PHP | Python SDK | Node.js SDK | Java SDK

```python
import requests

url = 'https://api-hft.upstox.com/v3/order/cancel?order_id=240108010445130'
headers = {
    'Content-Type': 'application/json',
    'Accept': 'application/json',
    'Authorization': 'Bearer {your_access_token}'
}

response = requests.delete(url, headers=headers)

print(response.text)
```

DELETE /order/cancel
