Get Trades

API to retrieve the list of all trades executed for the day. An order, initially submitted as one entity, can be executed in smaller segments based on market situation. Each of these partial executions constitutes a trade, and a single order may consist of several such trades.

Request

```
curl --location 'https://api.upstox.com/v2/order/trades/get-trades-for-day' \
--header 'Content-Type: application/json' \
--header 'Accept: application/json' \
--header 'Authorization: Bearer {your_access_token}'
```

For additional samples in various languages, please refer to the Sample code section on this page.
