Modify Order V3

Sandbox Enabled

API to modify an open or pending order. To perform a modification, the orderId is a required field. Along with the orderId, you should include any optional parameters that require modification. If no optional parameters are included in the modification request, the default values will be assumed from the original order.

Additionally this API includes latency information in the meta data object of the response, providing insight into the time Upstox took to process your request.

Request

```
curl --location --request PUT 'https://api-hft.upstox.com/v3/order/modify' \
--header 'Accept: application/json' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer {your_access_token}' \
--data '{
  "quantity": 2,
  "validity": "DAY",
  "price": 16.8,
  "order_id": "240108010918222",
  "order_type": "LIMIT",
  "disclosed_quantity": 0,
  "trigger_price": 16.9,
  "market_protection": 0
}'
```

For additional samples in various languages, please refer to the Sample code section on this page.

Request Body

Name	Required	Type	Description
quantity	false	integer (int32)	Quantity with which the order was placed
validity	true	string	Order validity (DAY- Day and IOC- Immediate or Cancel (IOC) order).

Name	Required	Type	Description
			Possible values: `DAY`, `IOC`.
price	true	number (float)	Price at which the order was placed
order_id	true	string	The order ID for which the order must be modified. For the regex pattern applicable to this field, see the Field Pattern Appendix.
order_type	true	string	Type of order. It can be one of the following MARKET refers to market order LIMILT refers to Limit Order SL refers to Stop Loss Limit SL-M refers to Stop Loss Market. Possible values: `MARKET`, `LIMIT`, `SL`, `SL-M`.
disclosed_quantity	false	integer (int32)	Indicates the volume to be displayed in the market depth. If provided, this value must be non-zero.
trigger_price	true	number (float)	If the order is a stop loss order then the trigger price to be set is mentioned here
market_protection	false	integer (int32)	Applicable for Market and Stoploss Market (SL-M) orders. This will be ignored if used with Limit or Stoploss Limit (SL) orders. **Default:** `-1`. `-1` = Automatic market protection as per guidelines. For more details, see Market Protection details. `1` – `25` = Custom market protection percentage (e.g. 2 for 2%). `0` = No market protection (Order will be

Name	Required	Type	Description
			rejected due to exchange restrictions on MARKET orders from API).

Responses 200 4XX

Response Body

```
{
    "status": "success",
    "data": {
        "order_id": "1644490272000"
    },
    "metadata": {
        "latency": 40
    }
}
```

Name	Type	Description
status	string	A string indicating the outcome of the request. Typically `success` for successful operations.
data	object	Response data for modify order request
data.order_id	string	Order ID
metadata	object	Order metadata associated with successful order modified.
metadata.latency	integer	The overall time taken by API platform to process the order modification request, measured in milliseconds.

Sample Code

Modify a delivery order

Python | Node.js | Java | PHP | Python SDK | Node.js SDK | Java SDK

```python
import requests

url = 'https://api-hft.upstox.com/v3/order/modify'
headers = {
    'Accept': 'application/json',
    'Content-Type': 'application/json',
    'Authorization': 'Bearer {your_access_token}'
}

data = {
    'quantity': 3,
    'validity': 'DAY',
    'price': 16.8,
    'order_id': '240108010918222',
    'order_type': 'LIMIT',
    'disclosed_quantity': 0,
    'trigger_price': 16.9
}

response = requests.put(url, headers=headers, json=data)
print(response.text)
```

PUT /order/modify
